The Petition of those supporting the move to recognise lads' mags and newspapers like the Daily Sport as part of the porn industry - to cover them up, to put them on the top shelf and to apply age restrictions to their sale

We the undersigned believe that:

- **Lads' mags and newspapers like the Daily Sport objectify and demean women by portraying them as sexual objects.**
- **They are directly linked to hardcore pornography and prostitution services though ads in their back pages and they are often just as contemptuous towards women as recognised top shelf titles**
- **It is unacceptable that these publications are sold next to magazines and broadsheet newspapers as if they were a normal part of our mainstream media.**
- **They should be recognised and regulated as part of the pornography industry and if sold, they should be covered up and put on the top shelf, with age restrictions applied**
- **The harmful effects of the messages and images that these publications promote should be recognised and addressed as part of gender discrimination**
